I was asking about the original product with chlorothalonil and MBT. I would like to know the inert ingredients in the product. Sorry if that wasn't clear. Thanks

Do you know if we will get the actual product?

From 2nd paragraph, under Update:

On October 5, 2018, the TCEQ conducted a site visit at the expected site of the alleged back siphoning occurrence. During the visit, a sample from the suspected source/product mixture was obtained. This will assist the EPA lab in their analyses. Although staff were able to obtain a sample of the suspected contaminant, more information is needed.

Attached are the Craft-Turney Updates and the New Release issued by TCEQ last evening.

I'll continue to monitor email to see if any updates occur throughout the weekend and Monday.
